I attended the Amerinet Pharmacy Leadership Council on May 5th in Las Vegas, NV. It was a great meeting. We started off with a round robin to introduce ourselves and what we were currently working on, any issues or dilemmas. Each person was to take about 5-10 minutes but the first person took about 20-30 minutes. It was estimated that we would finish the meeting at about 12:00 midnight. As each person spoke other people would offer advice or contacts which lead to further discussion. It was a great way to know what other pharmacies are dealing with and how you could maybe get some advice or a contact for further discussion.

Some of the big topics were Hazardous Waste and USP 797. The Amerinet staff went over some of the Amerinet contracts that are available that may help you with these two items.

It sounds like Amerinet is still trying to get a contract for a drug information system such as Micromedex, Clinical Pharmacology etc. This would be great.

This meeting is a good way for networking. Everyone benefitted in being there. Lots of good information. Amerinet does a great job in seeing and understanding our needs.

The overall meeting with the breakout sessions was just as good. If you go the Amerinet web site you can click on Education and Events. Then click on Events and you can look at all the different sessions with a copy of the power point presentations. The presentation on Drug Diversion was excellent. This was my favorite one. Susan McCann was a very good speaker. Take a look at this one!

Fabulous Meeting!
